Panhandle Users Group Meeting
FDOT Central Office Modeling Update
NWFRPM Status
NWFRPM V3.0 Update
February 23, 2017
FDOT District Three Office from 1:30pm to 3:30pm CST in the Design Conference Room

FDOT Central Office Modeling Update
Thomas Hill State Modeling Manager
FDOT Central Office

There are a lot of things going on at Central Office these days. Thomas will update us on all the goings on and take questions. Some of the things going on are the search for a software vendor for our model platform (our maintenance expired on December 31, 2016) and topics from the model task force meeting in December. Topics from Model Standardization to new and updated data sources including Bluetooth Coverage for Freight and Tourist movement and GTFS editing were discussed. You won't want to miss this presentation!

NWFRPM Status
Dan Beaty
HNTB Corporation

The current NWFRPM is being used by the FATPO, Okaloosa/Walton TPO and the Bay County TPO for the latest updates. There have been exceptions made on several FDOT projects in the use of the adopted model versus the adopted model with some changes. Dan will discuss the situations that necessitate modifications and explain the procedure to be followed if a change is requested. If you use the model you will want to hear this!

NWFRPM V 3.0 Update
Chris Simons
ATKINS, NA.

The NWFRPM has been updated to include all counties in District 3. This included updating the Socio-economic data, networks and the inclusion of mode choice and transit. Several enhancements were made to the model stream and procedures. Chris will present on the changes and will be available to answer any questions. Be sure not to miss this presentation as it will be the model being used in the District starting with the next round of LRTP updates.
