# 2014 AADT AND NUMBER OF LANES: INDEX MAP

SERIES INFORMATION

Annual Average Daily Traffic (AADT) measures how busy a roadway is. AADT is defined as total traffic volume of a roadway for a year divided by 365. Number of lanes in the maps indicates total number of through lanes on both directions of a roadway segment. For one-way street segments, number of lanes indicates total number of through lanes of the street segment.

Note:
1. The data presented in this map series is accurate up to date of production.
2. The maps are intended for planning purposes only.
3. All AADT are expressed in thousands.
4. The 2014 AADT reported along state roadways are consistent with the FDOT Annual LOS Reporting
5. The 2014 AADT reported along the non-state roadways are derived from the adopted and refined travel demand models.
6. The number of lanes depicted are as currently existing in 2014.

Data Source:
1. FDOT Annual LOS reporting, July 2015.
2. Southeast Florida Regional Planning Model 7 - Analyst version, April 2016.
3. Treasure Coast Regional Planning Model 4 - Analyst version, April 2016.
4. Selected PD&E studies as completed for or by FDOT D4 staff, within the last 5 years.
5. Base map is developed and maintained by the FDOT Transportation Statistics (TranStat) Office.
