

2040 AADT AND NUMBER OF LANES: INDEX MAP

SERIES INFORMATION

Annual Average Daily Traffic (AADT) measures how busy a roadway is. AADT is defined as total traffic volume of a roadway for a year divided by 365. Number of lanes in the maps indicates total number of through lanes on both directions of a roadway segment. For one-way street segments, number of lanes indicates total number of through lanes of the street segment.

- Note:
- 1. The data presented in this map series is accurate up to date of production.
 - 2. The maps are intended for planning purposes only.
 - 3. All AADT are expressed in thousands.
 - 4. The 2040 AADT reported along SIS facilities are consistent with the FDOT Annual LOS Reporting
 - 5. The 2040 AADT along the non-SIS facilities are derived from the adopted and refined travel demand models. Some of the reported AADT are obtained from the approved Project Development and Environmental (PD&E) studies completed within the last five years.

- Data Source:
- 1. FDOT Annual LOS reporting, July 2015.
 - 2. Southeast Florida Regional Planning Model 7 - Analyst version, April 2016.
 - 3. Treasure Coast Regional Planning Model 4 - Analyst version, April 2016.
 - 4. Selected PD&E studies as completed for or by FDOT D4 staff, within the last 5 years.
 - 5. Base map is developed and maintained by the FDOT Transportation Statistics (TranStat) Office.
