

# 2040 AADT AND NUMBER OF LANES: INDEX MAP

## SERIES INFORMATION

Annual Average Daily Traffic (AADT) measures how busy a roadway is. AADT is defined as total traffic volume of a roadway for a year divided by 365. Number of lanes in the maps indicates total number of through lanes on both directions of a roadway segment. For one-way street segments, number of lanes indicates total number of through lanes of the street segment.

- Note:
- 1. The data presented in this map series is accurate up to date of production.
  - 2. The maps are intended for planning purposes only.
  - 3. All AADT are expressed in thousands.
  - 4. The 2040 AADT reported along SIS facilities are consistent with the FDOT Annual LOS Reporting
  - 5. The 2040 AADT along the non-SIS facilities are derived from the adopted and refined travel demand models. Some of the reported AADT are obtained from the approved Project Development and Environmental (PD&E) studies completed within the last five years.

- Data Source:
- 1. FDOT Annual LOS reporting, July 2015.
  - 2. Southeast Florida Regional Planning Model 7 - Analyst version, April 2016.
  - 3. Treasure Coast Regional Planning Model 4 - Analyst version, April 2016.
  - 4. Selected PD&E studies as completed for or by FDOT D4 staff, within the last 5 years.
  - 5. Base map is developed and maintained by the FDOT Transportation Statistics (TranStat) Office.

## LEGEND

### Number of Lanes

A legend titled "Number of Lanes" showing 11 color-coded categories. Each category consists of a horizontal bar of a specific color followed by a numerical label. The colors transition from light green for 1 lane, through various shades of green, blue, purple, orange, and red, to black for more than 10 lanes.

The map displays the 2040 projected daily Level of Service (LOS) for Sebastian Blvd. The road is color-coded by lane count: 1 (light green), 2 (green), 3 (light blue), 4 (dark blue), 5 (purple), 6 (dark purple), 7 (orange), 8 (brown), 9 (pink), 10 (red), and >10 (black). AADT values are indicated by numbers along the road segments. Key features include:

- Geographic Context:** The map shows the intersection of Sebastian Blvd with US Highway 95 and the Indian River Lake. County boundaries for Brevard and Indian River are shown at the top.
- Interchange Area:** A note indicates "One-way links at interchange area. Zoom in for detailed information." near the intersection with US 95.
- Local Roads:** Other roads shown include 138 Ave, Wimbro Rd, 102 Ter, 101 Ave, and 90 Ave.
- Map Elements:** A compass rose and a scale bar (0 to 0.5 miles) are located in the top left. A green banner on the right side reads "2040 DAILY LEVEL OF SERVICE (LOS)".

The map displays the 2040 Daily Level of Service (LOS) for Indian River County. The color of the road segments indicates the number of lanes, ranging from 1 (light green) to >10 (black). The numerical values on the segments represent the AADT in 1,000s. The map includes a grid of roads with various street names and segment identifiers. Key roads shown include I-95, US-1, and several local streets such as 82 Ave, 66 Ave, 43 Ave, and 27 Ave. The map also shows the county boundary with St. Lucie County to the south.
