# Census Update

## Timeline

- State level totals released on April 26, 2021
- Redistricting data expected to be released on Aug 16, 2021
  - <https://www.documentcloud.org/documents/20973851-state-of-ohio-june-28-2021-notice>
- First dataset with differential privacy
  - Invariants – State population numbers, total number of housing units in each census block, as well as the number of prisons, college dorms and other group-living quarters in each block

## Transportation Implications

- Determine data products in advance
  - Might not get products relevant to our needs
- Invariants
  - Mathematical impossibilities such as inconsistencies between the number of households and the household population
- Only positive whole numbers
  - TAZ distortions due to state level invariants
