| Yujing Xie            | Keith & Schnars                  |
| Li Jin                | Kittleson Associates             |
| Thuha Nguyen Lyew     | Kittelson Associates             |
| Sheng Yang            | Marlin Engineering               |
| Elaine Martino        | Martino Planning                 |
| Samantha Smith        | Traf-O-Data                      |
| Zhong-Ren Peng        | University of Florida            |
| Barry Plath           | URS                              |
| David Rae             | URS                              |
| Gary Kramer           | West Florida RPC                 |
| <b>GIS Committee</b>  |                                  |

| Name                | Agency/Firm            |
|---------------------|------------------------|
| Daniel Miller       | BCC Engineering        |
| Lina Kulikowski     | Broward MPO            |
| Dan Beagan          | Cambridge Systematics  |
| Capton Siluvairajan | Cambridge Systematics  |
| Frank Tabatabaee    | FDOT Central Office    |
| Thuha Nguyen Lyew   | Kittelson & Associates |
| Sheng Yang          | Marlin Engineering     |
| Elaine Martino      | Martino Planning       |
| Samantha Smith      | Traf-O-Data            |
| Barry Plath         | URS                    |
| David Rae           | URS                    |
| <b>Others</b>       |                        |
| Minhua Wang         | Citilabs               |
| Matt Brady          | FDOT Central Office    |
| Naveen Modali       | Kimley Horn            |

### *Mobility Fee Discussion*

#### *Thomas Hill, FDOT District 2*

- All PowerPoint presentations are now available online at [www.fsutmsonline.net](http://www.fsutmsonline.net).
- Discussion items:
  - A member asked what the time frame was in coming up with a mobility fee framework. Thomas Hill answered that there is no time frame yet on this yet.
  - Thomas Hill stated that the key issue is to figure out a way to standardize various issues with mobility fees and emphasized the need for the committee to come up with some directions to do this effort.
  - A member asked if anyone has decided how to do mobility fees and Thomas Hill answered no. However, he added that currently vehicle miles traveled (VMT)-based mobility fees is the recommended approach.
  - Naveen Modali asked if there is any specific drawbacks in the current concurrency-based model. Thomas Hill answered that even though opinions vary, the legislature thinks the current concurrency-based approach is not optimal.
  - Another member asked what kind of information the MPOs need to get started to implement mobility fees has been identified. Thomas Hill answered that the Data Committee should sit down and get involved in this. He also explained how the Northeast Regional Planning Model (NERPM) addresses this issue.

### *Attraction Data Sources*

#### *Matt Brady, FDOT Central Office*

- All PowerPoint presentations are now available online at [www.fsutmsonline.net](http://www.fsutmsonline.net)
- No discussion items

# GIS/Data Committee Meeting Notes

November 9-10, 2009

## FSUTMS Standard Reports

*Albert Gan, Florida International University*

- All PowerPoint presentations are now available online at [www.fsutmsonline.net](http://www.fsutmsonline.net)
- No discussion items

## Network Data Model

*Minhua Wang, Citilabs*

- All PowerPoint presentations are now available online at [www.fsutmsonline.net](http://www.fsutmsonline.net)
- No discussion items

Meeting Adjourned at 12:15 PM.
